Purpose of Seminars

Can you manage your work health and safety (WHS) better and make a difference to your company's safety performance?

Half of the recommendations of the *Getting Home Safely* report (November 2012) target improving awareness and training in this critical area.

“The unacceptable safety performance in the construction industry in years 2011 and 2012 gave us a distressing wakeup call with an intolerable level of work site fatalities.”

Simon Corbell, ACT Minister for Workplace Safety and Industrial Relations

Do you meet your legal obligations of work health and safety? These seminars will raise your awareness and contribute to you meeting your legal WHS obligations.

Register for either one or both seminars by the web. Catering and free parking are provided.

Seminar one

1 WORKING SAFELY WITH PLANT

MANAGING THE RISKS OF MOVING PLANT ON CONSTRUCTION SITES

THE SEMINAR WILL:

- Identify the risks in Construction of moving plant both in the ACT & NSW.
- Outline current best practice.
- Ensure you understand your minimum obligations for legal compliance.

12.30	Panel Session Q&A
1.00	Lunch

Seminar two

2 IMPROVING SITE SAFETY – THROUGH PEOPLE

COMPETENCIES FRAMEWORK FOR SAFETY CRITICAL POSITIONS

The *Getting Home Safely* report found serious gaps in the way safety training was provided in this industry. If you manage people or have a role in planning and managing resources, then you are accountable under the law for safety.

If you are concerned that you may not be doing enough to lift the standards of communication and education in your business, this seminar is a must.

THE SEMINAR WILL:

- Identify the key safety critical tasks on construction sites.
- Identify who is best suited to perform these tasks.
- Demonstrate how to develop the competencies of your workforce in these tasks.
- List the knowledge, skills and behaviour that are required to complete the tasks effectively.
- Explain the safety system and framework that underpin these safety critical tasks.
- Demonstrate how these tasks can be readily customised to suit the size of your organisation and industry sector.
- Identify training providers and companies that can assist you to develop these competencies and framework for your organisation.

PROGRAM

1.40	Registration	3.20	Safety Leadership in Construction Sue Fricke, Safety Dimensions
2.00	Welcome and Introduction Graham Coyle, Federal Construction Management	4.00	Afternoon Tea
